September 5, 2018

Dear Parents:

On August 24, 2018, I sent a letter to inform you of the presence of mold in some of the B-Wing classrooms at Cherry Hill High School East. We have removed the affected items and have thoroughly cleaned the rooms. The district has deployed equipment to clean the air and permanently installed dehumidifiers in each of the impacted classrooms. On Friday, August 31<sup>st</sup> a technician from TTI Environmental Corporation tested the air quality of the rooms and adjacent hallway. Only one room was found to have elevated levels of mold spores in the air; all other rooms were of good air quality.

The identified room was cleaned again and "air scrubbers," which are machines used to remove mold spores and particulates from the air, were run continuously over the extended weekend. The room was retested Tuesday, September 4<sup>th</sup> and the air quality was still not acceptable. We have closed this room and have relocated its classes to other classrooms. Continuous efforts will be made to ensure that this classroom is prepared for occupancy. The room will be retested Monday, September 10<sup>th</sup>.

I assure you that no student will enter the affected room without the air quality being certified as acceptable. The health and safety of our students and staff are always our top priority.

Should you have any questions regarding this issue, feel free to call me at (856) 424-2222, extension 2501.

Sincerely,

A handwritten signature in black ink, appearing to read "Dennis Perry".

Dennis Perry, Ed.D.  
Principal,
